Masinloc, Zambales

Professional Summary

Computer Science graduate with hands-on internship experience in full-stack development, AI integration, and enterprise web applications. Skilled in React, Django, Laravel, REST APIs, SQL, and Microsoft Azure. Passionate about building secure, scalable software and continuously learning modern technologies.

Technical Skills

Programming Languages

- Python, Java, JavaScript, SQL, PHP

Web Technologies:

- Django, Laravel, HTML, CSS, REST APIs

Databases:

- PostgreSQL, MySQL, SQLite

Cloud & Platforms:

- Microsoft Azure, Termius, Microsoft 365

Productivity Tools:

- Visual Studio Code, Git, GitHub, Postman, Microsoft Office Suite
-

Professional Experience

Software Engineer Intern – Planate Management Group – SEAC

January 2026 - July 2026

- Developed and maintained full-stack web applications using React, Django, and Laravel.
 - Designed and integrated RESTful APIs, optimizing data flow between frontend and backend systems.
 - Built and maintained SQL databases, including schema design, migrations, and performance optimization.
 - Managed WordPress websites by updating content, resolving UI issues, and improving responsiveness.
 - Deployed, monitored, and maintained applications on Microsoft Azure using Termius, ensuring reliability and security.
 - Implemented AI-assisted solutions to automate workflows and improve operational efficiency.
 - Tested and validated enterprise business processes, including payroll, accounts payable, and customs-related workflows.
 - Collaborated in Agile development using Git, Postman, and Microsoft 365 to deliver high-quality software solutions.
-

Project Experience

- AI-Powered Finance Management Platform – Developed a full-stack web application using React, Django, PostgreSQL, and REST APIs to generate financial reports, analytics, and interactive charts.
 - AI-Driven Business Development Platform – Built an AI-assisted web application that automates proposal generation, social media marketing content, and business development workflows.
 - AI-Powered Human Resources Management System – Developed an HR management platform with an AI chatbot to streamline employee support, recruitment, and HR-related inquiries.
 - Blockchain-Based Voting System – Developed a decentralized voting application with secure voter authentication and tamper-resistant vote recording.
 - E-Commerce Website – Built an e-commerce platform with product catalog, shopping cart, and order management features.
 - Appointment Booking System – Developed an online booking system with appointment scheduling, customer management, and automated reservation workflows.
-

Educational Attainment

Tertiary:

President Ramon Magsaysay State University
Bachelor of Science in Computer Science
2025 - 2026

Secondary:

Northern Zambales College, INC - SHS
CSS - Computer System Servicing
2020 - 2022
